

Pathways Academy

A school serving students with Autism Spectrum Disorders, social skills and sensory processing disorders, ages 6-22. Fully approved by the Department of Elementary and Secondary Education.

Specialized Services Offered

Transition Planning and Psychopharmacology Services

Transition Planning services, Pathways Academy works with school districts and families to develop and implement student centered transition plans that encompass social pragmatics skills, self-care skills, community services, as well as college and vocational training.

Psychopharmacological services, are available through McLean Hospital's outpatient Child and Adolescent Program, by request. Priority is given to Pathways Academy's students. Payment for this service is covered by student's insurance, or privately by families.
